ATTACHMENT "C"

This application is being filed to change the manner and place of use of decreed surface water rights from the Carson River as originally allocated under the Carson River Decree. The point of diversion is unchanged (Segment 7E of the Carson River). Water will be diverted at the point of diversion when in priority and will be conveyed downstream through the Carson River, Lahontan Reservoir and thence to the proposed place of use via the existing river channel and canals as illustrated on the map filed in support of this application. No storage will occur in Lahontan Reservoir.

After passing through Lahontan Reservoir and depending upon need, water will continue down through the Carson River and then be routed through existing canals to the Stillwater Point Reservoir within the Stillwater National Wildlife Refuge.

This application is being made for the net consumptive duty of 2.5 acre-feet per acre as provided for under the Carson River Decree. Water will be used for the maintenance of wetlands for recreation/wildlife within the proposed place of use.
